KNOW HOW TO TEST iT

## We develop and manufacture inspection technology for all automotive devices:

## - tail lights

- lane change assistant
- sensors parking distance control (rear)
- bumper rear, electric check and check for variants

- chassis sensors

- tire pressure monitoring (transmitter / receiver / controller)

- variable torque split actuator

- door module, door side trim panel, switches, actuators, electric check and check for variants
- steering column switch
- steering angle sensor
- coil spring
- multi-function steering wheel
- cockpit panel
- cockpit control switches
